

Hide and showing folders

Go to the folder and copy its path

To hide the folder type `Attrib +S +H` past the path you copied (press right click to paste)

```
Microsoft Windows [Version 10.0.22621.674]
(c) Microsoft Corporation. All rights reserved.

C:\Users\Abdulkadir>attrib +s +h C:\Users\Abdulkadir\Desktop\test
C:\Users\Abdulkadir>
```

N.B: remember the path of the folder you hid is important you will need when you want to show it (save the path in text file)
